SUMMARY

Data analyst who builds Excel, SQL, and Python reporting that collections and operations teams actually use. At Denver Family Dental, increased posted collections 14% ($388,273 → $442,912) and cut 90+ A/R from 31.4% of open balance toward 14% by splitting insurance vs. patient aging into a daily follow-up queue.

SKILLS

Technical: SQL (PostgreSQL) · Python (pandas, numpy) · Excel (XLOOKUP, pivot tables, financial modeling) · Tableau · Power BI · Google Sheets

Finance & operations: A/R aging · collections · cash reconciliation · variance analysis · vendor / cost analysis · financial reporting · process documentation

EXPERIENCE

Financial Operations Analyst Denver Family Dental · Denver, CO **Jun 2024 – Present**

- Increased posted collections from $388,273 to $442,912 (+14%) and reduced 90+ A/R from 31.4% of open balance toward 14%.
- Built the Excel A/R tracker (insurance vs. patient aging, denial reason, next action) so the morning works the 90-day pile first.
- Analyzed supply spend by vendor and category; negotiated with top vendors and cut overhead where unit cost supported it.
- Tied wait times, scheduling, and staff notes to process changes that lifted the practice Google rating by nearly 1 point.

Assistant Head of School Guidepost Montessori · Dallas, TX · promoted from Lead Teacher **Jul 2023 – Jun 2024**

- Reconciled tuition billing for 100+ families; coded variable charges and tracked payment compliance across systems.
- Wrote data-entry standards so administrative records stayed consistent instead of living in three conflicting versions.

Guest Experience Lead RNR Hospitality Group · Scottsdale, AZ **Aug 2022 – Jun 2023**

- Owned daily cash reconciliation and shift-level reporting; tracked variance and flagged discrepancies the same day.
- Monitored inventory and vendor performance to tighten ordering and reduce waste.

PROJECTS

Python · Happiness and GDP data wrangling & correlation analysis

- Joined World Bank GDP to the World Happiness Report (1,927 country–years). Life evaluation vs. log GDP per capita: r = 0.836. pandas / numpy — melt, merge, corr, qcut.

SQL · Late returns pipeline PostgreSQL reporting

- Built a clerk call list and a store × category scorecard (On Time / Late / Still Out) with a nightly reload pattern so late copies do not hide inside revenue.

Tableau · Channel and inventory analysis public 10-K analog (Nike FY2025)

- Segmented revenue (−10%) vs. flat inventory by channel: Direct −13%, Wholesale −7%. Call: clear Jordan / digital depth; hold wholesale. Analog from public filings — not an employer.

EDUCATION

B.S., Data Analytics — Western Governors University **Expected 2026**

Coursework, Computational Mathematical Sciences — Arizona State University
