HALEY MAES

DATA ANALYST

Arvada, CO · (720) 467-3584 · haleymykellemaes@gmail.com · linkedin.com/in/haleymmaes
Portfolio https://haleymykellemaes-beep.github.io/

PROFILE

Data analyst who turns messy, day-to-day operational data into clear reporting and decisions. Skilled in SQL, Python, and advanced Excel, with experience building reporting systems, tracking down the drivers behind the numbers, and partnering across teams to fix what the data reveals. Reduced 90+ day receivables by 40% with an Excel aging tracker. Completing a B.S. in Data Analytics at WGU (November 2026).

TECHNICAL SKILLS

SQL (PostgreSQL) · Python (pandas, NumPy) · Advanced Excel (pivot tables, XLOOKUP) · Tableau · Power BI · Google Sheets · GitHub · AI-assisted development (Cursor, Claude) · KPI Reporting · Financial Reporting & Reconciliation · Variance Analysis · Process Improvement

EXPERIENCE

Billing & Operations Administrator (Financial Operations & Reporting) · Denver Family Dental · Denver, CO — June 2024 – Present

- Process 100-150 insurance claims per week; pull claims, payment, and A/R from the practice management system and reshape it in Excel into reporting the owner uses to prioritize collections.
- Excel A/R tracker (insurance vs patient aging, denial reason, next follow-up) used each morning to work 90+ balances first; 90+ A/R down $11K, from 31.4% of open balance to 18.7%.
- Built a denial-tracking workbook that categorizes denied claims by root cause so the team can correct, resubmit, and prevent repeats.
- Report collections across 10+ payment types and reconcile payments, overpayments, and refunds. Posted collections $388K to $443K (14%) in the same window; context, not a claim that the tracker caused the lift.
- Led payment-platform rollout: card fees 2.4% to under 1%, plus remote pay. Supply spend analysis by vendor and category to cut overhead.
- Connected wait times, scheduling, and staff notes to process changes that raised the practice's Google rating by nearly a full point.

Assistant Head of School promoted from Lead Teacher · Guidepost Montessori · Dallas, TX — July 2023 – June 2024

- Reconciled tuition billing for 100+ families, coding variable charges and tracking payment compliance across systems.
- Wrote data-entry standards and trained staff, replacing conflicting record versions with one source.

Guest Experience Lead RNR Hospitality Group · Scottsdale, AZ — August 2022 – June 2023

- Owned daily cash reconciliation and shift-level reporting, resolving variances the same day. Cross-checked inventory to POS sales to stop recurring discrepancies.

PROJECTS

Full write-ups: https://haleymykellemaes-beep.github.io/

Python · Happiness and GDP | https://haleymykellemaes-beep.github.io/happiness-gdp.html

- Joined World Bank GDP to the World Happiness Report (1,927 country-years). Life evaluation vs. log GDP per capita: r = 0.836. pandas / numpy - melt, merge, corr, qcut.

SQL · Late returns pipeline | https://haleymykellemaes-beep.github.io/late-returns.html

- Joined 7 source tables into a rental-level detail table and store x category scorecard (On Time / Late / Still Out); trigger and stored procedure for nightly refresh. Flagged high-revenue categories that hid low recirculation; clerk call list.

Tableau · Channel and inventory analysis | https://haleymykellemaes-beep.github.io/nike.html

- FY25 10-K analog: revenue -10% vs. flat inventory. Direct -13%, Wholesale -7%. Call: clear Jordan / digital depth; hold wholesale. Not an employer.

EDUCATION

B.S., Data Analytics — Western Governors University, online — November 2026

Computational Mathematical Sciences — Arizona State University
